

WILLIAM BROWN-LEWIS

San Antonio, TX • (254) 338-8754 • wbl127683@gmail.com • linkedin.com/in/william-brown-lewis

PROFESSIONAL SUMMARY

Cybersecurity student and builder with hands-on experience across AI data annotation, security research, workflow automation, and digital marketing/web operations. Track record shipping real automation systems (content pipelines, self-hosted infrastructure, security tooling) end-to-end, paired with leadership through Agile facilitation and campus community coordination. Dean's List honors with a strong technical foundation in Linux, cloud/self-hosted infrastructure, and threat analysis.

TECHNICAL SKILLS

Cybersecurity: Linux, Cyber Defense, Honeypot Deployment, Network Security, Threat Analysis, NFC/RFID Security Research, Vulnerability Scanning

AI & Automation: Data Annotation, Model Evaluation, LLM/API Integration, AI-Directed System Architecture, n8n, Docker, Ngrok, Workflow Design, Algorithmic Content Optimization

Infrastructure & Web: Self-Hosted Cloud Storage, Raspberry Pi, Site Performance/Speed Optimization, Git, Digital Asset Management

Marketing & Business: Paid Social & Content Strategy, Conversion Copywriting, Ad Creation, Customer Service, Campaign Analytics, Trading/Quantitative Analysis

Other: Leadership, Agile Facilitation, Event Coordination, Process Improvement

PROFESSIONAL EXPERIENCE

AI Quality & Data Annotation Specialist — *Handshake AI (Remote)* January 2026 – Present

- Performed high-accuracy data annotation and evaluation for AI model training across text and multimodal tasks
- Evaluated model reasoning quality, safety alignment, and output correctness to improve model reliability
- Recognized for consistency, attention to detail, and understanding of AI behavior patterns

Marketing, Web & Customer Operations Specialist — *Nightwalk* May 2026 – Present

- Managed end-to-end digital marketing operations including ad creation, direct-response copywriting, and multi-platform campaign strategy (TikTok, Instagram Reels)
- Built and maintained the brand website, optimizing page speed and load performance to support paid traffic and conversion goals
- Handled customer service and inbound communications, converting inquiries into resolved issues and booked sales
- Designed and tested ad copy variants across concepts, using performance data to guide creative and targeting decisions

Community Involvement & Leadership — *University of Texas at San Antonio* July 2024 – Present

- Coordinated multi-brand runway events and managed logistics for student-led fashion showcases
- Built professional networks across UTSA communities through digital platform management and communication
- Developed leadership skills through campus involvement and collaborative project execution

Fashion Model & Marketing Intern — *LVS&R & ELSIUM Clothing Brands* July 2024 – October 2025

- Modeled and marketed clothing collections across five niche fashion categories
- Executed retail marketing at pop-ups and kiosks; coordinated photoshoots and brand visibility initiatives
- Generated customer engagement and supported revenue growth through styling recommendations and sales support

IT Career Training — *KISD Career Center, Killeen, TX* January 2022 – December 2024

- Completed hands-on cybersecurity training in system protection, cyber defense, and threat identification
- Practiced vulnerability scanning, diagnosis, and remediation in simulated network environments

Digital Management & IT Specialist (Freelance) — *Killeen, TX* Winter 2023

- Managed digital logistics for apparel businesses; coordinated 5+ photoshoots bi-monthly
- Optimized workflows to complete all sessions within two-hour target timeframes

PROJECTS

Algorithmic Content & Engagement Optimization Engine — *Python, LLM APIs, Social Platform APIs*

- Built an automated content pipeline that generates, schedules, and analyzes short-form video campaigns across multiple social accounts
- Applied retention- and engagement-pattern analysis to iteratively optimize posting strategy and creative variants based on live performance data

Multi-Asset Algorithmic Trading Signal Platform — *Python, NumPy/Pandas, LLM-Directed Architecture*

- Specified and directed an AI coding assistant through detailed technical requirements to architect a production-style trading system: a two-sided (long/short) signal engine, walk-forward-optimized backtester with out-of-sample validation, and a memecoin scanner with credibility/rug-risk gating
- Designed the risk framework: fixed-fractional position sizing, R-multiple scale-out exits, break-even stop logic, and a persistent daily-loss circuit breaker
- Directed build-out of supporting systems: market regime filtering (VIX + dealer gamma), economic-calendar blackout windows around high-impact releases, and deduplicated Telegram alerting
- Demonstrates the ability to translate complex, domain-specific requirements into a coherent system spec and iteratively review/direct AI-assisted implementation — a core AI-collaboration and technical-communication skill

Self-Hosted Personal Cloud Storage — *Raspberry Pi, Linux*

- Converted a Raspberry Pi into a self-hosted personal cloud storage system, enabling remote upload and access of images and video from any device
- Configured secure remote access as a private, self-owned alternative to commercial cloud storage services

NFC Tag Security Research & Awareness Demo — *NFC/NDEF, Python, Web*

- Researched and demonstrated NFC-based social engineering risks (NDEF tag injection) using self-owned tags and devices in a controlled environment
- Built an accompanying awareness page and mitigation guide explaining detection and defense against malicious NFC tags

Local Voice-Model SaaS Tool — *n8n, Docker, Ngrok*

- Designed privacy-focused voice model service using n8n, Docker containers, and Ngrok tunneling
- Built automated pipelines for audio input, transcription, inference, and response generation

Honeypot Deployment & Analysis — *Raspberry Pi, Linux*

- Engineered and deployed a network honeypot to detect and analyze unauthorized access attempts
- Used Linux networking commands to monitor activity and study attacker behavior patterns

EDUCATION

Bachelor of Business Administration, Cybersecurity

University of Texas at San Antonio (UTSA) — College of Applied AI, Cyber and Computing | Expected December 2028 | GPA: 3.54

Dean's List (Fall 2025, Spring 2026) • Clubs: Ave Magazine, Period Society

High School Diploma

Harker Heights High School | Spring 2024 | GPA: 3.2

CONFERENCES & PROFESSIONAL DEVELOPMENT

- PEARC26 — Practice & Experience in Advanced Research Computing Conference, Minneapolis, MN — selected attendee, travel and lodging institutionally funded
- TACC Cybersecurity Camp — Texas Advanced Computing Center
- RowdyCon — UTSA cybersecurity conference
- Adobe Conference — UTSA, October 20
- BNI Business Conference
- Tech Day SATX

CERTIFICATIONS

- CompTIA Security+
- Certified Trader — Lucid Funded
- Agile Transformation Leadership Certification — Scrum Master
- IT Specialist - Network Security (Certiport)
- Computer Networking Fundamentals (NOCTI)
- Foundations of Cybersecurity (Coursera)

AWARDS & LEADERSHIP

- Dean's List — University of Texas at San Antonio (Fall 2025 & Spring 2026)
- Six Flags Leadership Visit — UTSA Alvarez College of Business Experiential Learning Week: behind-the-scenes leadership/operations visit connecting with Six Flags management on team motivation, park operations, and guest experience
- LeaderShape Institute Graduate — Week-long immersive leadership development program
- Military Order of the Purple Heart volunteer — Organized community events and charity initiatives
- Creative design — Custom apparel design and visual arts projects
